

OPRA®

Maintenance – Asset Lifecycle Management

Efficiency is the success factor

Some of the major challenges for manufacturers and operators of machines and plants are:

- Maximization of plant efficiency
- Productive maintenance over the entire service life of the systems
- Reducing total cost of ownership

This requires a holistic view of the data over the entire life cycle.

To collect, provide and evaluate operating data, as well as the necessary Managing processes in a user-friendly and efficient manner is the core competence of OPRA®.

Highlights

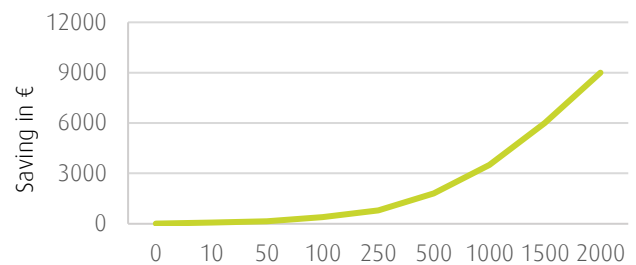

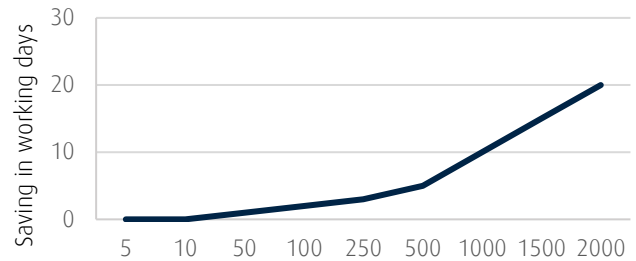

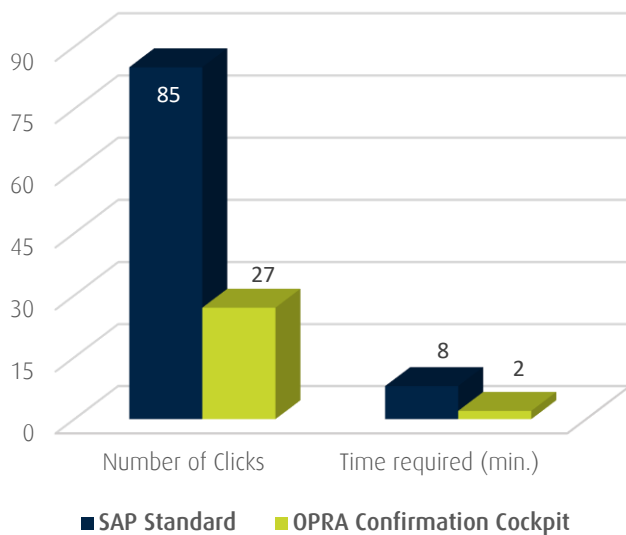

- SAP made easy
- Intuitive user interfaces
- 100% SAP
- process oriented
- Totally flexible
- Used by the biggest names in the industry
- Applicable for all industries and segments

Efficient operation, attractive design and optimum performance

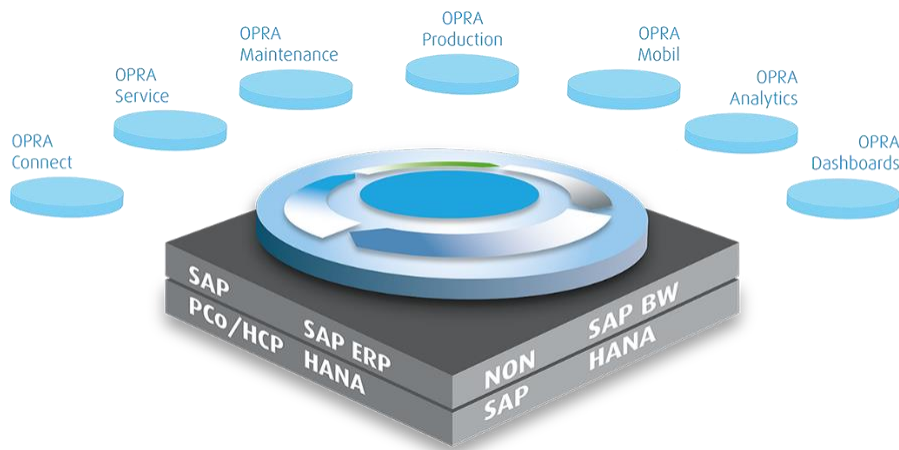

Benefits of redesign

Our customers were able to reduce the number of clicks to one third compared to the original amount, therefore saving up to 6 minutes per order processing. Saving up to 75% of time whilst working with OPRA®.
